

Amirreza Ektesabi

Backend Developer · Python & Django · Exploring AI/ML

Shiraz, Iran · ar.ektesabi@gmail.com · github.com/amirreza-ektesabi · linkedin.com/in/amirreza-ektesabi · stackoverflow.com/users/16004568

--- Summary ---

Backend developer with a Bachelor's degree in Computer Engineering and close to four years of experience building production systems with Python, Django, and PostgreSQL. Currently exploring machine learning and AI-driven applications.

--- Experience ---

Backend Developer · System Group

Mar 2026 – Aug 2026

Full-time · Remote

Built and maintained backend features for Afra, a management platform for charitable organizations, using Python, Django, Microsoft SQL Server, and Django Templates. Refactored legacy code, integrated AI agents into the development workflow, and handled deployment via IIS.

Backend Developer · System Group

Oct 2022 – Mar 2026

Full-time · Remote

Built and maintained backend features for Farsan, an intelligent order management system, using Python, Django, PostgreSQL, and Celery. Implemented real-time functionality with WebSockets, improved application performance, and used Elasticsearch and Kibana for monitoring; deployed via IIS.

--- Projects ---

CSE Archive

Backend and Telegram bot for a site archiving educational resources and references, built with Python, Django, and python-telegram-bot.

github.com/CSE-Archive/archive-api · github.com/CSE-Archive/archive-telegram-bot

CODOO

Real-time competitive coding duel platform with a live scoreboard. Django + Django Channels backend, React + Monaco Editor frontend, sandboxed Judge0 execution engine.
